CONTENTS

Introduction ix

1. INDIVISIBLES: 1 1
   Part 1: The Constitution of the Continuum 1
   Part 2: Democritus, Aristotle, and Epicurus 19
   A. The Democritean Beginnings 19
   B. The Aristotelian Critique 25
   C. The Epicurean Response 30

2. VACUUM: 1 41
   A. The Eleatic Challenge 41
   B. The Atomist Response: Leucippus and Democritus 44
   C. Aristotle Against the Void, 1:
      Refutation of the Pro-Vacuist Arguments 49
   D. Aristotle Against the Void, 2:
      Conceptual Objections 52
   E. Aristotle Against the Void, 3:
      Dynamical Objections 56
   F. Epicureanism 64
   G. Developments in Late Antiquity, 1:
      Philoponus and the Concept of Place 74
   H. Developments in Late Antiquity, 2:
      Empirical Pneumatics 76
   I. Developments in Late Antiquity, 3:
      The Extracosmic Void of the Stoics 79
   J. Developments in Late Antiquity, 4:
      The Divinisation of Space 80
# Contents

3. MATTER, FORMS, AND QUALITIES: 1 83
   Part 1: The Presocratics on Change 83
   Part 2: Reductionism and its Critics 100
   A. Leucippus and Democritus: The Programme of Mechanistic Reductionism 100
   B. Criticisms of Democritean Reductionism 110
   C. Aristotelian Matter Theory 118
   D. The Epicureans on Compound Bodies 128
   E. Epicurus and Lucretius on Primary and Secondary Qualities 135

4. THE MECHANICAL PHILOSOPHY: 1 142
   A. Action at a Distance 143
   B. Spontaneity 155
   C. Incorporeal Causes 170
   D. Teleology 176

5. INDIVISIBLES: 2 188
   Part 1: The Continuum Revisited 188
   Part 2: Atoms and Natural Minima 210
   A. The Fate of the Atomic Theory 210
   B. The Aristotelian Theory of Natural Minima 214
   C. The Rediscovery of Classical Atomism 222
   D. The Synthesis: Chemical Atomism 225

6. THE VACUUM: 2 232
   A. God and the Void, 1: The Annihilation of Bodies 232
   B. God and the Void, 2: Beyond the Cosmos 237
   C. Anti-Aristotelian Theories of Space 243
   D. Motion in the Void, 1: Impetus and Inertia 252
      a. The concept of ‘being in motion’ 262
      b. Intensive Magnitudes 265
      c. How to apply the Principle of Sufficient Reason? 266
   E. Motion in the Void, 2: Resistance and Velocity 268
F. The ‘Fuga Vacui’ 278
G. Conclusion 285

7. MATTER, FORMS, AND QUALITIES: 2 287
   A. The Nature of Matter 287
   B. The Status of the Elements in Compound Bodies 302
   C. Patterns of Explanation 311
   D. Natural Necessity 332

8. THE MECHANICAL PHILOSOPHY: 2 343
   A. Weight 343
   B. The ‘Species’ Theory 359
   C. Spirits 376
   D. Conclusion 384
      a. A mechanistic theory of perception 385
      b. A mechanistic account of bodily motion 385

9. INDIVISIBLES: 3 388
   A. The Labyrinth of the Continuum 388
   B. Mathematical and Physical Divisibility 402
   C. The Corpuscular Philosophy versus Chemical Atomism 421

10. VACUUM: 3 437
   A. Matter, Space, and Deity 437
   B. The Science of Pneumatics 464
   C. Interstitial Vacua and the Constitution of Matter 491

11. MATTER, FORMS, AND QUALITIES: 3 507
   A. Reductionism and Mechanism 507
   B. Forms and Qualities 508
   C. The Argument from Intelligibility 521
   D. Transduction and the Analogy of Nature 528
   E. The Lonely Corpuscle 539
   F. Secondary Qualities 544
# Contents

G. The Mechanical Theory of Perception 549
H. Heat and Cold 558
I. Colour 570
J. Real Essences and Human Knowledge 576

12. THE MECHANICAL PHILOSOPHY: 3 592
   A. Spontaneity: The Initiation of Motion 592
   B. Action at a Distance 612
      a. Elastic threads 615
      b. ‘Tongues’ 616
      c. Corporeal ‘species’ 616
      d. Resonance 617
      e. Currents of subtle matter 621
      f. The vortex theory 622
   C. Incorporeal Causes 633
   D. Teleology 640

APPENDICES 651
   Appendix 1: Physical Indivisibility 651
   Appendix 2: Aristotle on Prime Matter 663
   Appendix 3: Aristotle on Substantial Form 674
   Appendix 4: Nicholas of Autrecourt on the Vacuum 687
   Appendix 5: Reductionism and Mechanism 693
   Appendix 6: Mechanism and the Occult 702

BIBLIOGRAPHY 716
